CountWEB - Dancount Counting portal

CountWEB is Dancount's way of making people counting easy and accessible for all sizes of organizations, from the single shop anywhere in the world, to large, world-wide shop chains - this being owned chains, Franchise or a mix of these.

Dancount units are designed to be easy to mount and connect. The complete package includes PoE supply and sufficient cables to make a test connection.

With CountWEB all customers get access to their own Internet counting site with their own admin account, access to data, e-mail reports, export facility etc.

Dancount's hosting service is capable of handling virtually unlimited number of counting locations and individual logins.

All data collection and distribution of data are carried out through Dancount's servers located in safe server rooms. All systems are monitored and backed up.
